CYPHER PATTERN STRATEGY

Cypher Pattern Strategy Rules

- Open a 15-minute chart with the Harmonic Pattern Pro tool loaded onto the chart

  - *Can use any time frame

- Swing Strength: Big

  - *May need to adjust swing strength dependent on time frame

- Wait for the tool to identify a Cypher Pattern forming in a <u>trending</u> market on the chart

- Once a pattern forms, wait for price to print a reversal candle and execute at the close of the reversal candle

  - Aggressive Traders have the option of executing the trade without a reversal candle printing

- Stop will go a couple ticks beyond the invalidation level

- Target will be placed at either the 38.2% or 61.8% Retracement of the CD Leg for a large pattern OR the C point of the pattern for a small pattern
