

THE HIDDEN GAP LONG STRATEGY

Chart and Strategy Setup

1. Load the tool onto a 15-minute chart
2. Wait for the tool to identify a Wide Range Bar and plots the Hidden Gap (You can set audible alerts for this)
3. (Optional) Keep an eye on that market and wait for a pull back into the Hidden Gap
4. Once the market begins to fill the gap, wait for either a bottoming pattern to form or park an order at the top of the Hidden Gap
5. Execute the trade and place your stop at least a point below the Hidden Gap

THE HIDDEN GAP LONG STRATEGY

Tips and Tricks

- Hidden Gaps can also be viewed as hidden Supply or Demand areas within the market
- These areas can be great intraday support or resistance but do not carry them into the next day.
- The most recent Hidden Gaps are ideal trade locations
